

## AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning at page 1, line 24 as follows:

However, as the device performance has been significantly improved in recent years, the demand for a space-splicing and cost-reducing device has increased greatly. Especially, there is a keen demand for a device which can operate with current consumption [[than]] greater than 500 mA so as to realize various functions without using a separate AC power supply adapter or special accessories.

Please amend the paragraph beginning at page 7, line 25 as follows:

The main and sub device controllers 10a, 10b or the device controller 10f constitutes a control means of the electronic device 10. The CD-R device 10e constitutes a body portion of the electronic device (CD-R drive) 10. Similarly, the power supply circuit[[10e]] 10c constitutes a power supply control means of the electronic device 10. The host computer 26 constitutes external equipment having a power supply function.
